

DERIVATIVES OF GENKWANIN AND SAKURANETIN, COSMETIC AND
THERAPUETIC USE THEREOF AND PREPARATION METHOD OF SAME

Abstract

The invention relates to: (i) the use of osyl derivatives of genkwanin and sakuranetin having formula (I) in (a) cosmetics or dermatology and (b) therapeutics; (ii) the use of novel derivatives having formula (I) as industrial products; and (iii) the production method thereof [Formula (I)], wherein symbol [Formula (II)] represents a single or double bond, R represents H or an osyl residue, particularly with structure S^1 or s^2 [Formula (III)], Z represents H, an alkyl group at C_1-C_4 , acyl at C_1-C_5 , monosaccharide or sulphate.
